

Northwind Analytics - Release notes

Q3 2026 (v2.14)

Highlights

- Streaming search results on GET /v2/search
- Opt-in reranking with rerank=true (default off)
- Legacy POST /v1/documents upload endpoint removed

Benchmarks

p95 search latency fell from 1.9s to 1.2s across the August rollout window (a ~38% improvement).

Upgrade notes

No re-indexing is required; embedding and chunking defaults are unchanged.

Q3 2026 - API changes in detail

GET /v2/search

Accept: text/event-stream -> stream ranked results
rerank=true -> cross-encoder rerank pass

POST /v1/documents (REMOVED)

Use POST /v2/documents/presign, upload the bytes,
then POST /v2/documents/{id}/complete.

Deprecations

- None besides the v1 upload endpoint.
